To what degree should we rely on our own resources and methods to form opinions about important matters? To what degree should we depend on various authorities, such as a recognized expert or a social tradition? In this provocative account of intellectual trust and authority, Richard Foley argues that it can be reasonable to have intellectual trust in oneself even though it is not possible to provide a defence of the reliability of one's faculties, methods and opinions that does not beg the question. Moreover, he shows how this account of intellectual self-trust can be used to understand the degree to which it is reasonable to rely on alternative authorities. This book will be of interest to advanced students and professionals working in the fields of philosophy and the social sciences as well as anyone looking for a unified account of the issues at the centre of intellectual trust.

The book that inspired the major new motion picture picture Mandela: Long Walk to Freedom. Nelson Mandela is one of the great moral and political leaders of our time: an international hero whose lifelong dedication to the fight against racial oppression in South Africa won him the Nobel Peace Prize and the presidency of his country. Since his triumphant release in 1990 from more than a quarter-century of imprisonment, Mandela has been at the center of the most compelling and inspiring political drama in the world. As president of the African National Congress and head of South Africa's antiapartheid movement, he was instrumental in moving the nation toward multiracial government and majority rule. He is revered everywhere as a vital force in the fight for human rights and racial equality. Long Walk to Freedom is his moving and exhilarating autobiography, destined to take its place among the finest memoirs of history's greatest figures. Here for the first time, Nelson Rolihlahla Mandela tells the extraordinary story of his life—an epic of struggle, setback, renewed hope, and ultimate triumph.

Explores the nonviolent philosophy and environmental activism of India's Sunderlal Bahuguna. For decades, Sunderlal Bahuguna has been an environmental activist in his native India, well known for his efforts on behalf of the Himalayas and its people. In the 1970s, he was instrumental in the successful Chipko (or "hug") movement during which local people hugged trees to prevent logging for outside concerns. He was also a leader of the long opposition to the Tehri Dam. In both conflicts, the interests of outsiders threatened the interests of local people living relatively traditional lives. George Alfred James introduces Sunderlal Bahuguna's activism and philosophy in a work based on interviews with Bahuguna himself, his writings, and journalistic accounts. James writes that Bahuguna's work in the Indian independence movement and his admiration for the nonviolence of Gandhi has inspired a vision and mode of activism that deserves wider attention. It is a philosophy that does not try to win the conflict, but to win the opponent's heart.
