Skull of 3.8-million-year-old early human discovered in Reports |
Construction Industry Research and Studies

Aug 28, 2019 · A "remarkably complete" skull belonging to an early human ancestor that lived 3.8 million years ago has been discovered in Ethiopia. The skull, referred to as MRD, represents the early human

But discoveries of huts at Howick in Northumberland, and Star Carr, Yorkshire, dated to 8770–8460 BC, suggest that the wanderings of some Mesolithic people followed a seasonal pattern. It's thought that they visited the same places for hunting, fishing or winter shelter.

Sep 12, 2011 · Articles Introduction by Graham Hancock. I don't want GRAHAMHANCOCK.COM to be exclusively a Graham Hancock site, but a place where ideas and perspectives on the past can be put forward and discussed by other writers and researchers as well — and indeed by anyone with something interesting to say and the ability to say it.

Industry Research & Insights.
SmartMarket Reports provide research on emerging trends that are impacting and transforming the construction and building industry. Stay up-to-date on topics including risk management, building information modeling, world green building trends, and safety advancements.

It was discovered at Star Carr, which is a Mesolithic archaeological site in North Yorkshire, England. Excavation of the site began in 1948, and it is famous for the rare artifacts discovered. Along with the flints, there were a large number of objects made of red deer and elk antler, elk bone, and other bone.

Sep 19, 2019 · The Star Carr site is home to the oldest evidence of carpentry in Europe and of built structures in Britain. Photos&colon; Ancient finds PHOTO: P. Saura/Nature

May 08, 2021 · Perhaps unsurprisingly given the doctor's name, it turned out that Dr Carr had a penchant for vintage vehicles and inside there was a 1937 Bugatti Type …
